ELECTRONIC WEIGHING PLATFORMS FOR INDUSTRIAL APPLICATIONS

Designed for precision and durability, these small and medium-capacity electronic weighing platforms feature a robust tubular steel structure with an AISI 304 stainless steel load plate, ensuring reliability and hygiene in industrial and commercial environments. Equipped with a certified "single point" aluminum load cell (OIML R60, 3000e) and IP65 protection against dust and moisture, the platforms guarantee accurate and stable measurements even under demanding conditions. Adjustable feet, a built-in level bubble, and a 3-meter shielded connection cable facilitate easy installation and integration into automated weighing and control systems.

Dimensions (W*D) mm	Maximum capacity (kg)	Standard division (g)	CE-M division (g)	HR division (g)
300x300	6	1	2	0,2
300x300	15	2	5	0,5
300x300	30	5	10	1
400x400	15	2	5	0,5
400x400	30	5	10	1
400x400	60	10	20	2
400x400	150	20	50	5
500x500	30	5	10	1
500x500	60	10	20	2
500x500	150	20	50	5
600x600	60	10	20	2
600x600	150	20	50	5
600x600	300	50	100	10
